

# DEFENCE FUNDING STREAMS

Commonwealth and NSW Government grant and support programs available for defence industry.

**02** **Minimum Viable Product Grants**

Up to \$25K matched funding available for NSW pre-revenue technology startups to engage with potential customers, channel to market or achieve first sale.

**04** **Innovation Connections**

Up to \$50K for businesses to research an idea with commercial potential. Grant will cover 50% of the cost of research placements.

**06** **NSW Small Business Innovation & Research Program (SBIR)**

A \$12M program that provides competitive grants to NSW SMEs to develop and commercialise innovative solutions to well-defined problems for NSW Government.

**01** **DIN Internship Program**

The program places highly-skilled STEM PhD students into defence small-to-medium enterprises for three months.

**03** **CSIRO Kick-Start**

Up to \$50K to help start-ups and small businesses pursue R&D activities, and develop or test a novel product.

**05** **STEM+ Business Fellowships**

Up to \$115K p.a. to place early-career STEM researchers into SMEs for 2-3 years. The aim is to build new connections, accelerate new technology and help SMEs to grow.

**07** **ARC Linkage Projects**

Up to \$300K p.a. to promote research alliances between academics and industry.

Collaboration

09

### Cooperative Research Centres (CRC-P)

Up to \$3M for industry-identified and led collaborative research projects.

11

### Defence Innovation Hub

10-year Innovation program established by the Department of Defence to identify technologies with defence applications and help them to move to the mature stage in a collaborative way.

13

### Defence Collaborative Research Centres (CRC)

The program links industry with researchers to develop next-generation defence and national security technologies.

Strategic

08

### NSW Physical Sciences Fund

Up to \$5M to support the development and commercialisation of high impact technologies in NSW.

10

### Sovereign Industrial Capability Priority Grant

Up to \$1M p.a. for up to 50% SME cost of a project that builds capabilities aligned with Defence's Sovereign Industrial Capability Priorities.

12

### AMGC Commercialisation Fund

Up to \$1M for up to 50% of the eligible cost to Australian companies to commercialise new products and processes in later stages of technology readiness.
